

## Updating procedure for MAX COMBO NET

Necessary material:

- USB 2.0 device.
- Last available software version.

To proceed with the upgrading, you must have the file with last available version, which you can download from:

[http://www.ftemaximal.com/ingles/firmware\\_receivers.php](http://www.ftemaximal.com/ingles/firmware_receivers.php)

From this website, you will reach a ZIP compressed file which must be decompressed in the root folder of the USB Memory device.

Once you have the update file in the root folder of your memory, please proceed to connect the memory at front connector of the receiver.

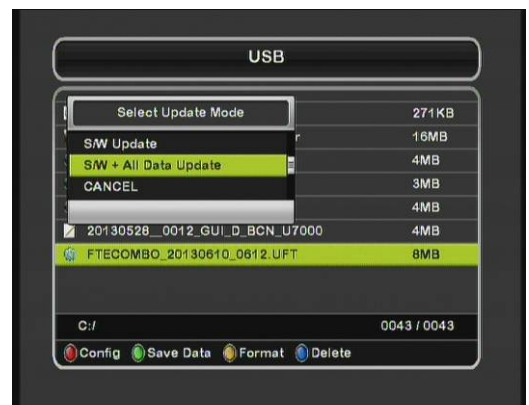

Select Menu / Utility / USB and and press OK.

Select the upgrade file *.UFT* with CH+/CH- keys and press OK.

Select the upgrade mode "S/W + All Data Update" with CH+/CH- keys and press OK in order to start the updating.

In this moment the updating is complete.
